(54) Title: OPTICAL DATA STORAGE SYSTEM HAVING COMBINED FLUORESCENT THREE-DIMENSIONAL INFOR-MATION CARRIER

(57) Abstract: A general optical storage system (OSS) contains an optical drive and a fluorescent multilayer disc (FMLD) (10), which can be realized as a multilayer structure with data storage in fluorescent spots like pits or spiral grooves, divided by layers, transparent to reading and fluorescent radiation. The OSS includes a spectrum filter (516) and fluorescent signal reception device (514), capable of reading FMLD, as well as reflective CD and DVD discs (including CD-R, CD-RW, DVD-R, etc.). Increase of pit width in FMLD and use of microangle mirrors allow increasing information signal. Elimination of FMLD fluorescence lifetime influence on data pulses duration allows increasing data reading rate. The absorption indices of different layers of FMLD were optimized.

International application No. PCT/US 00/19422

Box i	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This Inte	ernational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2.	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
з. 🗌	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)
This Inte	emational Searching Authority found multiple inventions in this international application, as follows:
	see additional sheet
1. X	As all required additional search fees were timely paid by the applicant, this international Search Report covers all searchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the Invention first mentioned in the claims; It is covered by claims Nos.:
Remark	on Protest The additional search fees were accompanied by the applicant's protest. X No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-9 22-26

Optical data storage and reading device comprising a multilayer fluorescent information—carrying optical disc, characterised by the type of filter used to spatially separate the reading radiation from the information—carrying radiation.

2. Claims: 10-19

Optical data storage and reading device comprising a multilayer fluorescent information-carrying optical disc, characterised in having a light controlling element for increasing an amount of the information-carrying radiation which reaches the detector.

3. Claims: 20-21

Optical data storage and reading device comprising a multilayer fluorescent information—carrying optical disc, characterised in having a compensating electronic device for compensating for an influence of dye fluorecence lifetime.

4. Claims: 27-44 51

A multilayer hybrid fluorescent optical disc characterised by its structure.

5. Claims: 45-50

Fluorescent composition for a hybrid fluorescent optical disc.
